FOR IMMEDIATE RELEASE

## RIVERSIDE COUNTY LIBRARY SYSTEM COMMITS TO EXPANDED RFID AND PC MANAGEMENT

**Riverside, CA** County Librarian Nancy Johnson today announced the expansion of RFID and PC/Print Management throughout the Riverside County Library System. After a very successful pilot of EnvisionWare technology solutions at the Home Gardens Library, the library has formally committed to a county-wide migration to EnvisionWare beginning later this month. Included in this project is the EnvisionWare OPEN STANDARD turnkey RFID solution coupled with the award winning OneStop Full-service Kiosk, and the EnvisionWare Suite which includes PC Reservation® and LPT:One™.

“The thirty-two libraries of Riverside County Library System will represent one of EnvisionWare’s largest end-to-end technology installations and the largest adopter of EnvisionWare Renaissance RFID to date”, said Mike Monk, Vice President and co-founder of EnvisionWare. “Having witnessed the empty shelves just hours after opening the Home Gardens library, it would be hard to conceive of the number of staff that would be required to handle this many transactions without RFID”, added Monk.

John Himes, EnvisionWare Regional Manager of the Southwest had this to say, “Luther Brady [Automation Manager for Riverside] is a real professional with great vision. Working with people like Luther and Nancy [County Librarian] are what make this a great industry. They have a vision for the future that sees harmony between people and technology and they leverage that vision in support of a rapidly growing, very dynamic library system.”

Riverside County Library System holds over one million items and circulates more than two million annually.

EnvisionWare is the world’s leading supplier of end-to-end self-service solutions for libraries and creator of the award-winning OneStop Full-service Kiosk. EnvisionWare delivers a complete *OPEN STANDARD* RFID solution and is committed to interoperability and customer choice.
